

Tubular

Use the Tubular jQuery plugin to add a youtube video as a background video

- 1) Go to <http://www.seanmccambridge.com/tubular/> and download the tubular plugin
- 2) Create a new project (new index.php, style.css and script.js). Also include jQuery
- 3) Create a <main> element with an id of "wrapper"
- 4) Insert a couple of headings and minimum two <p> with content
- 5) In the script.js insert a jQuery document ready
- 6) In the document ready code, call the tubular plugin on the #wrapper with the following video id: dQw4w9WgXcQ
- 7) If it is working, find another video on youtube to use

Snippets

```
$().ready(function() {  
    // Your code here  
});
```

```
$('#wrapper').tubular({videoId: 'dQw4w9WgXcQ'});
```
